

# Device Seizure

## CELL PHONE & PDA FORENSIC SOFTWARE

*Acquire and analyse data from over 2,200 mobile phones, PDAs, and GPS devices including iPhones (2G, 3G, & 3G's)*

Paraben's Device Seizure is your first line of defence in handheld forensics. Unlike data management software turned forensic tool, Device Seizure has its roots in digital forensics with such things as PDD (Palm DD command line acquisition), deleted data recovery, full data dumps of certain cell phone models, **logical and physical** acquisitions of PDAs, data cable access, and advanced reporting.

The amount and quality of data you can get from a full physical acquisition far surpasses the information you can get from a simple logical acquisition. Accessing phones via IrDA and Bluetooth should only be used when other data connections are not available due to the insecure nature of these communication methods. With support for more devices than ever before and the addition of Symbian 6.0 support, no toolbox will be complete without Device Seizure.

### Supported Mobile Phone Manufacturers

LG

Motorola - Including iDen

Nokia

Siemens

Samsung

Sony-Ericsson

i-Phone

### KEY FEATURES:

- Comprehensive easy-to-use interface
- USB and serial support
- Comprehensive data acquisition of text messages, address books, call logs, and more
- Recovers deleted data
- Verification of file integrity with use of MD5 and SHA1 hash values
- Built-in file viewing of proprietary files
- Built-in searching and book marking
- Text and Hex viewers
- Data Carver for multi-media files
- Analyses PDA data files stored on PCs
- Built-in recovery Palm password (prior to Palm OS 4.0)
- Windows CE registry viewer
- Acquires complete GSM SIM card information including deleted data
- Full flash download for certain models of mobile phones
- Image viewing for graphic information, including data carving for multi-media files for most devices
- Comprehensive HTML, text, XLS, PDF reporting
- Encrypted image files to guarantee image integrity
- Text searching (including Unicode) and hex information in the acquired data
- Export acquired data to PC
- Viewing acquired data with external viewer
- Import of databases acquired with PDA Seizure, Cell Seizure and SIM Card Seizure & DDS (Deployable Device Seizure)
- Supports CSI Stick Files
- Export of acquired data to Parabens Link2 for easy link analysis
- Comparing 2 databases to verify differences in their structure
- Includes 1 year subscription
  
- Paraben's Point 2 Point has been integrated into Device Seizure. The Point 2 Point feature converts GPS data points to be read directly into Google Earth so investigators can quickly and easily visualize where these GPS locations are.
