

Screen Capture for Manual Investigations

Eclipse Screen Capture Kit

The Eclipse screen capture tool is designed for efficiency and ease-of-use when conducting manual examinations. Intuitive software for evidence capture allows you to efficiently take screen shots, record video and audio, and annotate evidence. Custom reports can be quickly generated for professional evidence presentation. Eclipse hardware combines a high resolution camera that allows you to adjust focus and lighting while fine-tuning the captured image. The high quality stand is designed for stability and holds devices in place, allowing you to navigate quickly while recording evidence.

A total Eclipse - one tool that does it all
