- 100 Disk Capacity Hoppers
- Unattended transfer of evidence files to CD-R/DVD-R disk
- Compatible with EnCase evidence files
- MD5 code created and logged for each disk
- Makes single or multiple disk sets
- Professionally labels each disk
- Reads data from CD/DVD for analysis

Benefits:-

- Facilities copying evidence files to CD-R/DVD-R disk sets
- Faster distribution of computer forensics evidence
- Unattended operation saves time and money
- Labelled disks for court presentations and archive libraries

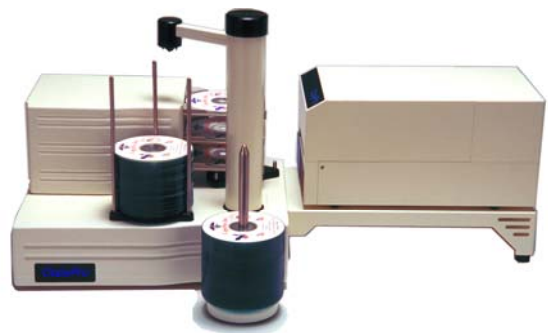

FDA – 100 Pro is a complete forensic solution which will analyse data on evidence media and automatically archive case files to CD or DVD with fully detailed disk labels.

Transferring EnCase evidence files to a set of CD-R or DVD-R disks is a very time consuming task when done manually.

Robotic autoloading disc recorder and EviDisc Evidence File Archiving software automates the disk loading and recording process. Plus, the system's disk printer professionally labels each disk.

To allow auditing of system activity and disks, EviDisc creates a log file comment and MD5 hash code for each disk processed by the system.

In summary, the Evi-Disc system offers an EnCase evidence file-to-disk processing solution that supports computer forensics standards and features unattended operation.
