

# Forensic ToolKit 3.0

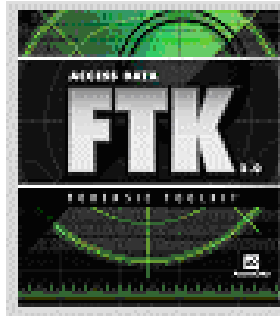

## Find, Organise & Analyse Computer Evidence

### Features:

- Advanced Code Breaking & Password Recovery
- Full Unicode & Code Page Support
- Advanced Email Support
- Powerful Search Functionality
- Broad File System Support
- Deep & Mature Data Processing Engine

### Benefits

- Integrated database eliminates the memory issues associated with other solutions
- The most user-friendly forensic tool on the market
- Unmatched speed & true multi-processor support

### Advanced Code Breaking & Password Recovery

Recover passwords from over 80 applications; harness idle CPU's across the network to decrypt files and perform robust dictionary attacks

### Full Unicode & Code Page Support

Search, display and report on data in its native format, in any language that Unicode supports, including Arabic, Hebrew, Chinese, Japanese and Hangul

### Advanced Email Support

Simplify the toughest email investigation by supporting a wide range of email and web mail formats including MBOX, PST, AOL, DBX, EDB, RFC 822, Hotmail, Yahoo and more.

### Powerful Search Functionality

Leverage DT Search and Oracle's search engines for indexed search and a proper full-feature regular expression engine for binary searches

### Broad File System Support

Effectively analyse FAT, FAT32, NTFS, EXT2, EXT3, ReiserFS, HFS Plus, ISO9660, Ghost, VMware and more – all from a familiar and easy-to-use interface.

### Deep & Mature Data Processing Engine

Ensure no artifact is missed whether from unallocated, allocated or anywhere in between.

### Integrated database eliminates the memory issues associated with other solutions.

- The first and only forensic tool to fully leverage an integrated Oracle database, enabling it to scale and support the largest and most complex investigation.
- End the suffering of countless application crashes, lost work and general product instability that plague other solutions due to memory issues.

### The most user-friendly forensic tool on the market

- Easy-to-understand and easy-to-use GUI, known across the industry for its intuitive user interface, features user definable views, pre-processing refinement, dockable windows and automated data categorisation.
- Rich & powerful reporting engine that blows away anything on the market with a wizard that allows you to create detailed reports in line with any requirement and output them into HTML, native format & PDF.
- Export functionality that allows examiners to extract relevant artifacts without compromise, maintaining source, metadata & path.

### Unmatched speed and true multi-processor support

- True multi-processor & multi-threaded support that not only improves speed, performance & stability in single processor machine, but also allows you to leverage the power of commonly available multi-processor machines.
- View & analyse data immediately while processing takes place, without having to wait hours.

# ***Forensic Software Products***

## **AccessData Password Recovery Toolkit™ (PRTK)**

### **Recover Passwords Quickly & Easily**

The Password Recovery Toolkit gives you the ability to recover passwords from well-known applications and gain access to encrypted files and drives, including the encrypted file system (EFS) from Microsoft.

## **AccessData Distributed Network Attack**

### **Putting Idle Time To Work**

In the past, recoveries have been limited to the processing power of one machine. DNA uses the power of machines across the network or across the world to decrypt passwords.

## **Infinadyne CD/DVD Inspector software**

Professional software for intensive analysis and extraction of data from CD-R, CD-RW and DVD media. Tailored for professionals in data recovery, forensics, and law enforcement.

## **Spector**

### **Automatically Record Everything Someone Does on Their PC**

Spector AUTOMATICALLY takes hundreds of screen snapshots every hour, very much like a surveillance camera. With Spector, you will be able to see EVERY instant message, e-mail, web-site visited and keystroke typed.

## **WetStone - Gargoyle Investigator™**

Forensic Pro Edition includes WetStones most advanced malware detection software package and malware datasets for rapid, in-depth forensic investigations. It is designed for forensic analysts, forensic laboratories, law enforcement personnel, corporate investigation teams, and advanced private investigators

## **WetStone - Stego Suite**

Provides investigators with advanced steganography investigation capabilities. This suite includes four software tools; Stego Hunter, StegoWatch, StegoAnalyst and StegoBreak, allowing investigators to detect, analyze and in certain circumstances recover hidden information.
