- Dimensions: 8"H x 17"D x 8"W
- Weight: 25lbs approx.
- Power: 120/220V

The CopyPro range of standalone disk copiers, offers advanced functionality and a range of production speeds and hopper capacity. Lower speed models can be upgraded in the future should your requirements change.

User Friendly Operation - CopyPro standalone systems are self contained - no PC hook-up is required - and offer a complete and convenient solution for all your diskette duplication needs. All you do is push a button, following simple step by step instructions on the LCD display. First you load your master diskette through the Input Bin into the Read/Write drive. Fill your input bin with blank diskettes and start your duplication process. Each copied diskette is independently verified and forwarded to the output bin, or in the case of an error to the reject bin. During the duplication process, the LCD screen displays accurate information about the number of copied/rejected diskettes etc.

There are three models of CopyPro 2000 standalone with 20, 44 or 140 disks per hour throughput. All models will format, write and verify in a single pass ensuring that your copied disks are perfect.

Install the system that meets your needs. There is a solution for small office runs, as well as high capacity production.
