- Works with any IDE, EIDE or Ultra-DMA hard drives
- Conforms to U.S. Dept. of Defence standard DoD 5220.22-M
- Ability to lock unit setting with supervisor password

- 48-Bit support for drive > 137GB
- Virtually no degradation in speed adding drives
- Mix different size/type of drives on the same load
- Adaptors available for S-ATA or notebook drives
- Software and Firmware upgradeable
- Automatic cable test before every run.

The WipeMASter product is designed as a compact, standalone hardware solution for sanitising and erasing drive data for up to nine drives simultaneously at speeds exceeding 3.0GB/min

WipeOut is designed to work with any IDE drive, formatted to any file system whether or not the data on that drive is corrupted.

WipeMASter has two high speed drive erasure modes, Fast and DoD (Department of Defence)

### Fast

This mode will perform a single overwrite of each sector.

### DoD

This mode provides a total security solution which complies with the US Department of Defence standard DoD 5220-22M. In this mode every sector of the hard disk is over written seven times with a different bit pattern each time. This ensures that no data can be recovered.
