

Registry Viewer™

Analyse & Decrypt Registry Data

Features:

- Access & Decrypt Protected Storage Data
- View Independent Registry Files
- Report Generation
- Integrates with Access Data's Forensic Tools

The Access Data Registry Viewer gives you the ability to view independent Windows registry files. Using the Registry Viewer provides access to the "Protected Storage System Provider" key, which contains e-mail and Internet passwords and settings. Easily generate reports containing valuable data from Registry keys of interest. The Registry Viewer includes a USB dongle to restrict unauthorised use.

Access & Decrypt Protected Storage Data

- AutoComplete "form" data from Google, Yahoo and more
- Internet Explorer account login names and passwords
- Outlook and Outlook Express account information including servers, users and passwords

View Independent Registry Files

- Access User.dat, NTUser.dat, Sam, System, Security, Software, and Default files
- Opens all versions of Windows Registry files
- View files individually without reconstructing the full registry

Report Generation

- HTML reporting capabilities
- Easily integrates with Forensic Toolkit case reports

Integrates with Access Data's Forensic Tools

- Seamlessly load Registry files directly from the Forensic Toolkit into the Registry Viewer
- Generate password lists for use with Password Recovery Toolkit

Other Forensic Software Products

AccessData Forensic Toolkit™ (FTK)

The Ideal Toolkit for the Forensics Specialist

Includes Forensic Toolkit, Password Recovery Toolkit, Registry Viewer, 50 Client DNA License and the Oracle database.

AccessData Password Recovery Toolkit™ (PRTK)

Recover Passwords Quickly & Easily

The Password Recovery Toolkit gives you the ability to recover passwords from well-known applications and gain access to encrypted files and drives, including the encrypted file system (EFS) from Microsoft.

AccessData Distributed Network Attack

Putting Idle Time To Work

In the past, recoveries have been limited to the processing power of one machine. DNA uses the power of machines across the network or across the world to decrypt passwords.

Spector

Automatically Record Everything Someone Does on Their PC

Spector AUTOMATICALLY takes hundreds of screen snapshots every hour, very much like a surveillance camera. With Spector, you will be able to see EVERY instant message, e-mail, web-site visited and keystroke typed.
