

Stego Suite

Discovering the Hidden

Benefits:

- Accurate detection of steganography
- Continuous scanning and monitoring of web domains
- Detailed reporting of results
- Active defense against unauthorised information hiding

Post mortem analysis of data recovered from a digital crime scene can be a tedious process. When the digital data contains thousands of images, audio files, or digital video that may contain other hidden evidence, the process can be impossible without the aid of key technologies and expertise. Stego Suite's tools provide the ability to quickly examine and evaluate digital image and/or audio data for the presence of hidden information or communications.

Active Web Scanning of a web site to ensure that unauthorised persons are not using the site to exchange innocuous looking message or smuggle proprietary data is also becoming a must. The tools of Stego Suite baseline a web domain and continuously scan the domain for the presence of hidden data inside digital images

In the last decade, the technology for digitally manipulating image, video and audio data has advanced tremendously resulting in the ability to rapidly hide information in binary data files. Numerous web sites offer "stego" programs free for downloading. The potential for industrial espionage, trade secret theft, cyber weapon exchange and criminal co-ordination are boundless.

The Stego Suite™ is the most advanced software bundle available for the investigation, detection, analysis, and recovery of digital steganography.

Many government and commercial organisations are greatly concerned and have sought tools to identify the use of digital steganography in its many forms.

Stego Suite is such a tool that identifies the presence of steganography without prior knowledge of the steganography algorithm that might have been used against the target file. Known as "blind steganography detection, this capability is exclusive to Stego Suite.

Stego Suite is comprised of three products:

- **Stego Watch™**: WetStone's flagship steganography tool – Allows users to detect digital steganography, or the presence of communications hidden in digital image or audio files.
- **Stego Analyst™**: A state-of-the-art image and audio file analyser – A full featured imaging tool allowing investigators to also search for visual clues that steganography has in fact been utilised in both image and audio files.
- **Stego Break™**: WetStone's new and exciting password cracker – An application designed to obtain the passphrase that has been used on a file found to contain steganography.

Other Forensic Software Products

AccessData Forensic Toolkit™ (FTK)

Find Computer Evidence Quickly & Easily

The Forensic Toolkit offers law enforcement and corporate security professionals the ability to perform complete and thorough computer forensic examinations. FTK features powerful file filtering and search functionality.

AccessData Password Recovery Toolkit™ (PRTK)

Recover Passwords Quickly & Easily

The Password Recovery Toolkit gives you the ability to recover passwords from well-known applications and gain access to encrypted files and drives, including the encrypted file system (EFS) from Microsoft.

Registry Viewer™

Analyze & Decrypt Registry Data

Registry Viewer gives you the ability to view independent Windows Registry files. Registry Viewer provides access to "Protected Storage System Provider" information, which contains e-mail and Internet passwords, settings and search terms.

AccessData Distributed Network Attack

Putting Idle Time To Work

In the past, recoveries have been limited to the processing power of one machine. DNA uses the power of machines across the network or across the world to decrypt passwords

WipeDrive™

Completely Eliminate Hard Drive Data

Erases ALL data from your physical hard drive prior to capturing a new image. Complies with DoD 5220.22-M standard.

Spector

Automatically Record Everything Someone Does on Their PC

Spector AUTOMATICALLY takes hundreds of screen snapshots every hour, very much like a surveillance camera. With Spector, you will be able to see EVERY instant message, e-mail, web-site visited and keystroke typed.

Other Products:-

- Forensic Tools
- Hard Disk Duplicators
- Floppy Disk Copiers
- CD/DVD Duplicators
- CD/DVD Printers

Media Duplication Services For:-

- Floppy Disk
- CD
- DVD
- Tape
- Blank Media Supply
- Standard or Customised Packaging
- Fulfilment Service
