

Tableau

Super Write Protect Kit

The portable Tableau Kit which contains the popular family of writeblocking hardware for use in acquiring a forensically sound image of virtually any hard drive you may encounter.

This is the super kit which can be customised to suit your needs. It has 8 spaces for standard Tableau blockers or your hard drives in the custom cut foam.

Contents of the Tableau Write Protect Kit:

- 1 x T35es S-ATA bridge
- 1 x T4 SCSI bridge
- 1 x T8 USB bridge
- 2 x TP2 power supplies with power lead
- 2 x Portable Hard Drive Coolers
- FireWire 9 to 9, 9 to 6, 6 to 6 and 6 to 4 cables
- 2 x USB cables
- 1 x SCSI 68 pin to 50 pin and SCA adaptor
- 1 x Tableau 2.5" Adaptor
- 1 x Tableau 1.8" Adaptor
- 1 x Tableau ZIF Adaptor
- 1 x Tableau Utilities disk
- 1 x Addonics Write Protected Smart Card Reader
- Peli 1500 case (black) with laser cut high density foam and lid organiser

T35es – FireWire800 & USB2 & e-SATA to

IDE/SATA Bridge

The newest Tableau write-blocker, the T35es Forensic SATA/IDE Bridge delivers robust features and performance, establishing it as the new standard by which all other write blocking devices will be measured. Built to support SATA and IDE drive imaging from a single Classic-sized package, the T35es delivers performance that blows the doors off other hardware writeblockers.

T4 –FireWire800 & USB2 to

SCSI Bridge

The T4 is compatible with SCSI devices including the fastest Ultra 320 hard disks currently on the market. The T4 will negotiate with the SCSI device to use the fastest available 16-bit or 8-bit SCSI transfer mode up to 80MB/s. The T4 is compatible with both LVD (Low-Voltage Differential) and SE (Single-Ended) SCSI devices.

T8 – FireWire800 & USB2 to

USB Bridge

Tableau's Forensic USB Bridge brings secure, hardware-based write blocking to the world of USB mass storage devices. The T8 supports USB2.0 High-Speed (480 mbit/s), USB 1.1 Full-Speed (12 mbit/s) and Low-Speed (1.2 mbit/s) devices conforming to the USB Mass Storage "Bulk-only" class specification.

Other Tableau Writeblockers

T15 – FireWire800 to SATA (pocket size)

The T15 measures approximately 6cm (W) x 3.5cm (H) x 2.3cm (D), and is designed to attach directly to a SATA hard disk without the need for SATA signal or SATA power cables. Also available as read/write operation.

T14 - FireWire800 to IDE (pocket size)

Measuring approximately 6cm (W) x 3.5cm (H) x 2.3cm (D), the Tableau T14 is the smallest FireWire800 IDE forensic bridge on the market.

T14 - FireWire800 to IDE (pocket size)R/W

The YELLOW case T14-RW is identical to the regular BLACK case T14, except that the T14-RW is pre-configured at the factory for read-write operation.

T35es – IDE/SATA Bridge

The T35es eSATA Forensic Bridge offers more native host computer and device connection options than any other write-blocker available today. With the T35es, you'll have a robust and reliable forensic bridge with four different host interface connections (eSATA, FireWire 800, FireWire 400, and USB), and two device-side connections (SATA and IDE).

T5 – IDE Bridge R/W

The YELLOW case T5-RW is identical to the regular BLACK case T5, except that the T5-RW is pre-configured at the factory for read-write operation.

T35i – Forensic IDE/SATA Bridge – Bay mounted

The T35i is designed to mount directly in a forensic workstation. Internally the T35i connects to the workstation through a high-performance FireWire800 connection. Externally, the T35i can be connected to SATA or IDE hard disks (one at a time) for write-blocked forensic acquisitions.

T335 – Forensic Drive Bay Controller

The T335 is designed to be mounted in a 5.25" half-height drive bay on the front of a forensic workstation or tower. The T335 is specifically designed to work in conjunction with SATA and IDE removable drive trays, which should be mounted in close proximity to the T335 in the host computer.
