

TCP-7200

Complete DVD +/-R Publishing System

Features:-

- Two Writers
- Easy Operation
- Standalone Or Networked System
- Auto Format Detection
- Internal Hard Drive
- Choice of Thermal or Inkjet Printer

- User Friendly Interface With LCD Display
- Large 220 Disk Capacity
- Reliable Robotics
- High Speed Up to 48x CD

The new TCP-7200 is a high volume publishing system. Based on established controller technology the TCP-7200 will function as a standalone system which requires no host PC. For added flexibility a network option is also supplied to turn the system into a shared resource accessible by other users on your network.

Configured with 2 high speed writers, 220 disk capacity hoppers and an integral CD printer, the TCP-7200 is the ideal solution for unattended operation.

High quality components are used within the robotic assembly to ensure long term reliable operation. This combined with the proprietary TrueCopy technology means this publishing system will produce the finest quality copies, whatever the format.

Printing has never been easier with the advanced TrueCopy controller. Create your print image using the program of your choice and either save it to disk to load with your master or send it via the network direct to the publishing systems hard drive.
