

VOOM Shadow 2

Immediate Computer Forensic Investigations

- Only with Shadow

Features:

- Portable
- MD5 verified

Uses:

- Preview a drive prior to imaging in the field
- As an investigative tool, boot the suspect client and connect to their network

- Repeatable clean investigation of a suspect computer from the operating system perspective
- Lab tool to view the suspect system again and again, in seconds, without re-imaging
- Can use multiple Shadows in a single system to view all hard drives in a single computer safely
- Enable investigators, juries and judge to see first hand what the suspect sees, without damaging or altering evidence

The VOOM Shadow 2 is a patented computer hardware device that is designed to aid the investigation of a computer's hard drive. A computer forensic test lab in a box, it provides investigators with read write access from the host computer's perspective, while maintaining the original hard drive unchanged.

The Shadow 2 actually re-directs all writes to itself, at the host-to-drive physical interface level. At any time, the investigator can 'Zero' the Shadow 2, which allows the investigator to begin again only a few seconds.

One of the primary benefits of the VOOM Shadow 2 is that it enables an investigator to boot and view a suspect's system on site, without threat of altering the evidence on the boot drive. You have the ability to install investigative tools to examine the suspect drive without ever changing the original. Boot and view the suspect system just as the suspect sees it.

The VOOM Shadow 2 will not cause the operating system to lock up the way a traditional write blocker does.

Because VOOM Shadow 2 does not change anything from the host computer's perspective, and because it is a true hardware solution, it works with any operating system and any software on the native system.

No software is loaded onto the suspect system to run Shadow 2 (although if you do, with Shadow 2 installed, no changes will occur on the suspect drive).

Presentation to the case investigator and prosecutor has traditionally been very time consuming. The Shadow 2 allows those key partners to see and use the system exactly as the suspect would so courtroom presentations are more effective.

VOOM Shadow Drive

Compatibility:

- Works with all operating systems, including Win98, DOS, WinXP, Win2K, Mac and Linux, Vista and 64bit
- CHS drives (drives less than 1GB)
- Drives up to 2TB (2000GB) Standard

Other Products:-

- Software Cloning Tools
- Hard Disk Duplicators
- CD Duplicators
- CD Printers
- Floppy Disk Copiers

Media Duplication Services For:-

- Floppy Disk
- CD
- DVD
- Tape
- Blank Media Supply
- Standard or Customised Packaging
- Fulfilment Service
